

Contents

Preface	vii
Introduction	xi
I Algebra, Number Theory, Calculus, and Dynamical Systems	I
1 Arthur Cayley and the First Paper on Group Theory, <i>David J. Pengelley</i>	3
2 Putting the Differential Back Into Differential Calculus, <i>Robert Rogers</i>	9
3 Using Galois' Ideas in the Teaching of Abstract Algebra, <i>Matt D. Lunsford</i>	21
4 Teaching Elliptic Curves Using Original Sources, <i>Lawrence D'Antonio</i>	25
5 Using the Historical Development of Predator-Prey Models to Teach Mathematical Modeling, <i>Holly P. Hirst</i>	45
II Geometry	55
6 How to Use History to Clarify Common Confusions in Geometry, <i>Daina Taimina and David W. Henderson</i>	57
7 Euler on Cevians, <i>Eisso J. Atzema and Homer White</i>	75
8 Modern Geometry after the End of Mathematics, <i>Jeff Johannes</i>	93
III Discrete Mathematics, Computer Science, Numerical Methods, Logic, and Statistics	99
9 Using 20th Century History in a Combinatorics and Graph Theory Class, <i>Linda E. McGuire</i>	101
10 Public Key Cryptography, <i>Shai Simonson</i>	109
11 Introducing Logic via Turing Machines, <i>Jerry M. Lodder</i>	125
12 From Hilbert's Program to Computer Programming, <i>William Calhoun</i>	135
13 From the Tree Method in Modern Logic to the Beginning of Automated Theorem Proving, <i>Francine F. Abeles</i>	149
14 Numerical Methods History Projects, <i>Dick Jardine</i>	161
15 Foundations of Statistics in American Textbooks: Probability and Pedagogy in Historical Context, <i>Patti Wilger Hunter</i>	165

IV	<i>History of Mathematics and Pedagogy</i>	181
16	Incorporating the Mathematical Achievements of Women and Minority Mathematicians into Classrooms, <i>Sarah J. Greenwald</i>	183
17	Mathematical Topics in an Undergraduate History of Science Course, <i>David Lindsay Roberts</i>	201
18	Building a History of Mathematics Course from a Local Perspective, <i>Amy Shell-Gellasch</i>	207
19	Protractors in the Classroom: An Historical Perspective, <i>Amy Ackerberg-Hastings</i>	217
20	The Metric System Enters the American Classroom: 1790–1890, <i>Peggy Aldrich Kidwell</i>	229
21	Some Wrinkles for a History of Mathematics Course, <i>Peter Ross</i>	237
22	Teaching History of Mathematics Through Problems, <i>John R. Prather</i>	243
	About the Authors	251
