Contents

Mathematics and the Mathematical Sciences in 2010: What Should Students Know?	1
Mathematics and Mathematical Sciences in 2010: What Should a Graduate Know? Some Predictions for the Next Decade, <i>Thomas Banchoff</i>	13
The Mathematics-Intensive Undergraduate Major, <i>Herb Clemens</i>	21
Mathematics and the Mathematical Sciences in 2010: What Should Graduates Know?, <i>Wade Ellis, Jr.</i>	27
The Mathematical Education of Prospective Teachers of Secondary School Mathematics: Old Assumptions, New Challenges, <i>Joan Ferrini-Mundy and Bradford Findell</i>	31
Two Critical Issues for the Math Curriculum, <i>Roger Howe</i>	43
Accountability in Mathematics: Elevate the Objectives!, <i>Sandra Z. Keith</i>	51
The Mathematics Major at the Start of the New Century, <i>Joseph Malkevitch</i>	63
Business View on Math in 2010 C.E., <i>Patrick Dale McCray</i>	73
The Mathematics Major Overview, <i>David A. Sanchez</i>	81
Mathematics and Mathematical Sciences in 2010: The How of What Graduates Should Know, <i>Kathleen G. Snook</i>	87
Teaching and Learning on the Internet, <i>Gilbert Strang</i>	95
First Steps: The Role of the Two-Year College in the Preparation of Mathematics-Intensive Majors, <i>Susan S. Wood</i>	101
